Targeted Corporate Networking TCN is an on-going, cross-sector coordination and management process which, by means of proactive, company-wide networking, ensures the lasting achievement of the overall objectives in the company.

Keep one step ahead with **TCN**. Now and in the future.

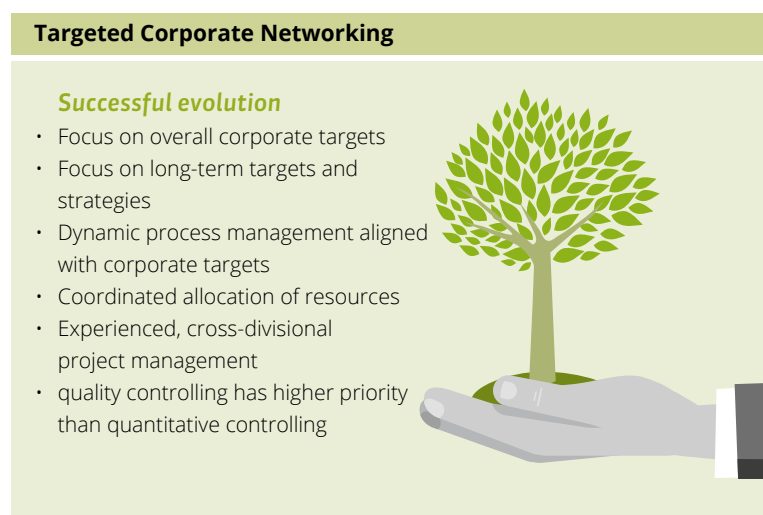

Targeted management and monitoring

Greater efficiency thanks to methodical information and communication management.

TCN demands and promotes further development.

Reduce risks through the shared will to develop and improve.

Continual and sustained growth.

Systematically shaping the future by consequently exploiting opportunities and through the targeted use of available resources.
